EDUCATION

Bachelor of Science - Specialization in Computer Science

2020-2025

University of Alberta

Edmonton, AB, Canada

GPA: 3.7

EXPERIENCE

Technology Risk Consultant

KPMG Canada

May 2026 – Present

- Evaluated client IT environments by reviewing infrastructure, applications, and security processes to assess technology risks.
- Performed testing of General IT Controls (GITCs) including user access management, privileged access, password configurations, change management, and backup & recovery controls.
- Collaborated with client stakeholders to gather evidence, discuss findings, and provide practical recommendations to strengthen IT control environments.
- Supported multiple client engagements simultaneously while maintaining high-quality documentation and meeting project deadlines.

Telematics Data Analyst Co-op

North American Construction Group

September 2023 – April 2025

- Automated extracting KPI's (key performance indicators) through ETL pipelines from 10 million+ time-series data points from 500+ equipment assets through direct collaboration with field operations, producing a real-time custom dashboard that improved resource-deployment accuracy by 15%.
- Architected and deployed a scalable cloud-native full-stack application using Azure App Service with continuous integration/continuous deployment (CI/CD) in Azure DevOps, facilitating real-time data ingestion and cleaning across enterprise systems, that replaced existing third-party software, generating an estimated \$80000+ in annual cost savings.
- Built interactive Power BI and ArcGIS dashboards, integrating spatial and operational data to identify chronic offender zones and perform heat-mapping analyses. Also developed feature layers and helped troubleshoot server failures in Esri ArcGIS, increasing system uptime by 25%.

SKILLS

Programming: Python, SQL, JavaScript, HTML/CSS

Technology Risk & IT Audit: General IT Controls (GITCs), ITGC Testing, Information Controls, User Access & Change Management, Logical Access, Risk Assessment, Audit Evidence, Control Recommendations

Data Analysis & Visualization: Pandas, NumPy, Matplotlib, Power BI, Tableau, Excel, ESRI ArcGIS

Cloud & DevOps Tools: Azure DevOps, Functions, App Services, SQL Databases

Machine Learning & AI: LangChain, Hugging Face, Google Gemini, Scikit-learn, OpenCV, TensorFlow (basic), PyTorch (basic), NLTK, Transformers, RNNs, CNNs

Other: Strong communication skills, ability to explain complex analysis clearly, proactive mindset, willingness to take ownership, tendency to dig deeper into unexpected results, ability to execute analytical tasks and models under minimal guidance

PROJECTS

UofA Cameron Library Headcount Forecasting ([Code](#))

Technologies: Python, Flask, Numpy, Pandas, sklearn, OpenGridCV, Seaborn, JS, HTML, CSS

- Conducted exploratory data analysis (EDA) to understand behavioral usage patterns over time.
- Engineered features and developed regression models to forecast hourly traffic trends.
- Applied statistical validation techniques and hyperparameter tuning to improve prediction accuracy.
- Built visualizations to communicate model performance and business implications.

PDF-Based Information Retrieval Chatbot ([Code](#))

Technologies: Python, Streamlit, LangChain, Gemini (Google GenAI), FAISS

- Built a document QA chatbot that processes PDF uploads and answers user questions with context using Google's Gemini LLM via LangChain.
- Handled real-time queries across 50+ pages of documents, supporting multi-turn conversations with retrieval-augmented generation.
- An average response time under 2 seconds for semantic search and answer generation was achieved.

CERTIFICATIONS

Data Visualization Virtual Experience Program - TATA [[Credential](#)]

Data Analysis and Technical Consulting Virtual Experience Program – SAP [[Credential](#)]

Data Analysis with Python – FreeCodeCamp [[Credential](#)]

Data Science and Machine Learning Bootcamp – Udemy [[Credential](#)]

Pandas – Kaggle [[Credential](#)]

Data Visualization - Kaggle [[Credential](#)]
